

Gallery System's unique integrated lighting option makes exhibition-quality illumination easy & economical—extend your Original Gallery System's art hanging capabilities or install on its own to add art lighting to any wall.

Note: Lighting is compatible with our Original Gallery System only, not GalleryOne

Step 1: Choose the Number of Lights You Need

Gallery System's sleek, stylish light wands and specially selected cool-running 12-volt LEDs provide art-safe exhibition-quality illumination. They lock on to the wall track at any point, and are easily moved or adjusted. In general, we recommend one wand for every 2-3 feet of space to be illuminated.

Price for Wand with LED Bulb: \$69.00

Sold separately: Wands \$54.00, Bulbs \$19.89

Step 2: Choose your Power Supply

For basic installations of **up to five light wands**, you can use the Gallery System Power Pack.

If your installation requires **more than five light wands**, start with our robust 300-watt transformer, and add a Junction Box and enough cable to cover the desired length of wall track.

Gallery System Power Pack

Includes UL-listed 60-watt power supply, switch, junction box, and all cabling.

Price: \$198.00

300-Watt Transformer

UL-listed transformer plugs into any wall outlet; you will need one junction box per transformer.

Price: \$130.00

Junction Box

Mounts on the wall track and provides circuit-breaker overload protection.

Price: \$78.00

Cable

Lays flat inside Original Gallery System Wall Track, secured by double-sided adhesive tape, to provide power to the light wands.

Price: Cable \$1.29/per foot

Double-sided Adhesive tape \$15.00/per roll (180 feet)
